---

Phil,

I have attached an IOM from Vickie Reat to myself that represents the sum of TCEQ's comments to the Mixing Zone Study. Please let me know if you have any questions regarding the comments.

Joe

Joe,

We only have two outstanding submittals at this time. First, Chuck Stone is reviewing the Sediment Transport Model Report that was submitted on June 4, 2009, along with Dr. Earl Hayter of the U.S. Corps of Engineers. (we need to check on the status) The only other outstanding deliverable is the Mixing Zone Study that was distributed on June 14, 2009. I assumed you would promptly assign this document for review without my direction or explanation, since we have been discussing this submittal for months. Comments are due no later than July 15, 2009.

With respect to Jessica's meeting summary; this was provided out of courtesy, as well as the other studies that have been sent by Dr. Turner. No response is expected since these are for your edification.

If you need anything further, please let me know.

Philip H. Allen, P.E.

Phil (or other EPA reps if Phil is unavailable),

TCEQ is somewhat confused about what EPA's expectation is for these submitted documents. We did not attend the meeting (no invitation to do so), so we are scratching our heads as to whether EPA desires to see TCEQ's comments upon these materials or if they are being provided purely for reference. Can you respond to this E-mail with your expectation so that, if we are to provide comment, I can begin the process of review assignment to our subject matter experts?

Thanks,

Joe
